/lab.lowing tissue(s): lens. The library was constructed
according to Bonaldo, Lennon and Soares, Genome Research,
6:791-806, 1996. First strand cDNA synthesis was primed
with an oligo-dr primer containing a Not I site. Double
stranded cDNA was ligated to an EcoR I adaptor, digested
with Not I, and cloned directionally into pT773-Pac
vector. The oligonucleotide used to prime the synthesis of
first-strand cDNA contains a library tag sequence that is
located between the Not I site and the (d7)18 tail. The
sequence tag for this library is CGATTAGGGA. This library
was created for the program, Gene Discovery in the Visual
System, supported by National Eye Institute (NEI)."

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

SERENT NO. US20020102639A1

GENERAL INFORMATION:

TITLE OF INVENTION: Evi27 Gene Sequence and Protein Encoded Thereby

TITLE REFRENCE: D6138

CURRENT APPLICATION NUMBER: US/09/778,971

CURRENT FILING DATE: 2001-02-02

PRIOR APPLICATION NUMBER: US 60/180,374

PRIOR PILING DATE: 2000-02-04

SEQ ID NO 3

SEQ ID NO 3
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ATGGTCCAACACACACTCACTCCAGGAGACTTGAGGGACCTCCAAGTGGAACTCGTCAAG

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                            Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence
